

(a) Moneda homogénea (grafo regular)

$$\hat{U} = \hat{S} (\hat{I}_p \otimes \hat{C}), \quad |\psi_k\rangle = \hat{U}^k |\psi_0\rangle$$

(b) Moneda local por nodo (grafo irregular, esta memoria)

$$\hat{U}_t = \hat{S}_t \hat{C}_t^{\text{coin}} \quad (\text{no es un producto tensorial simple})$$
